Nepal-Bangladesh merchandise trade: opportunities and challenges

Neelu Thapa South Asia Watch on Trade, Economics and Environment (SAWTEE) 22 January 2024 Surkhet

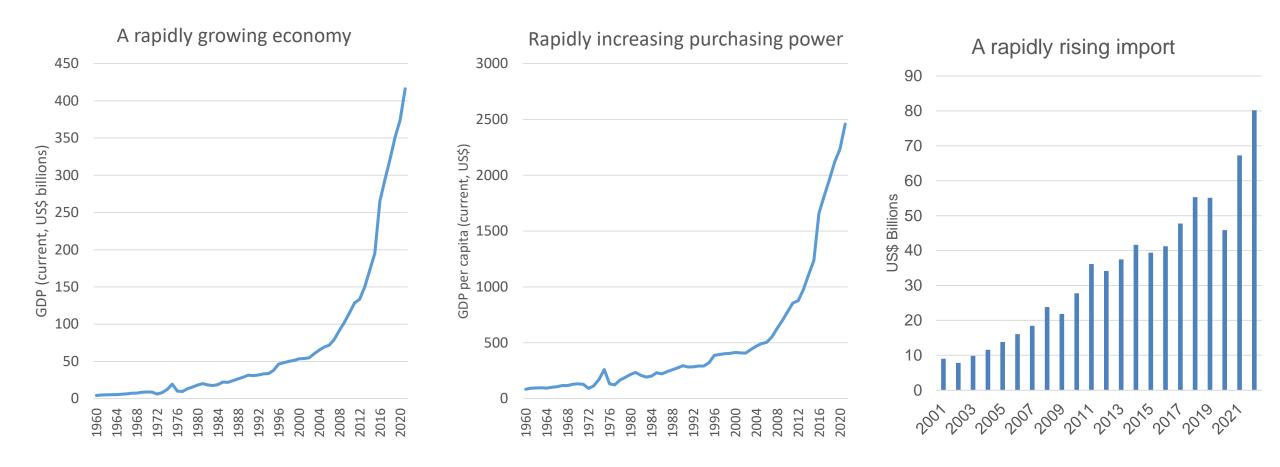

Draws on the study and presentations on "Assessment of Nepal Bangladesh Trade" by Kshitiz Dahal and Ayush Poudel

Need and possibility of Nepal-Bangladesh Trade

- Trade Dependence on India
- Need for market diversification
- Bangladesh as a potential market due to the following features
 - **Proximity**: Kakarvitta (Nepal)-Panitanki (India)-Fulbari (India)-Banglabandha (Bangladesh)
 - A long history of cooperation: seventh to recognize Bangladesh as an independent country; diplomatic relations started formally on 8 April 1972; Trade and Payments Agreement, 1976 and Transit Agreement, 1976
 - **Parties to a FTA**: SAFTA (since 2006)
 - Partners in regional cooperation initiatives: SAARC, BIMSTEC, BBIN

Bangladesh as a potential market for diversification

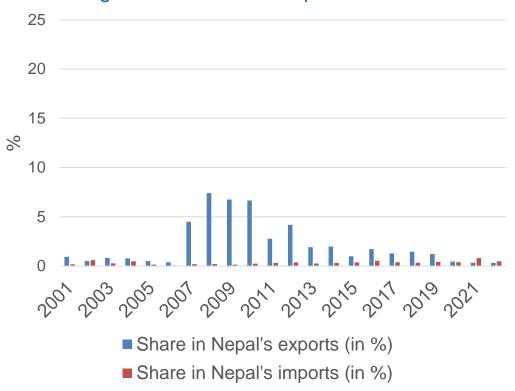

A rapidly growing dynamic market A high capacity to absorb imports

Vastly unrealized trade potential

US\$ millions 2002 2003 2005 2006 2006 2007 2008 -Export -Import

Nepal-Bangladesh trade trends

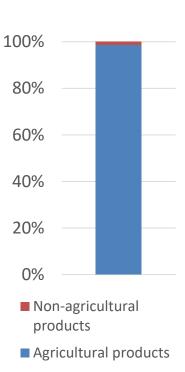

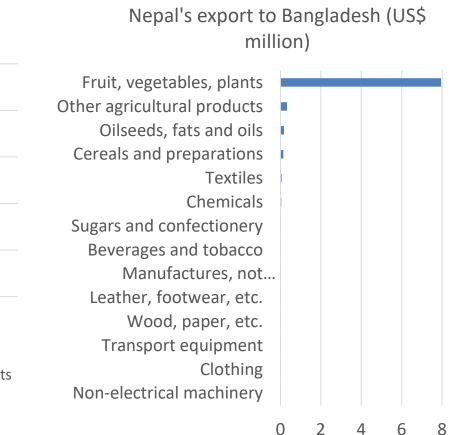

Bangladesh's share in Nepal's total trade

Nepal's export profile: narrow and concentrated

Top 10 exports to Bangladesh (5-year average): 98.5%

HS6	Description	(US\$	Share in Nepal's export to Bangladesh (%)
071340	Lentils	7.83	89.52

Top 10 imports from Bangladesh Source: Department of Customs and author's calculation Nepal's imports from Bangladesh, by Category Source: Department of Customs and author's calculation Potential export products: study methodology

- 1. Compile trade data for 5 years (ITC trade map)
- 2. Remove products that have been exported by Nepal for only 2 years or less or imported by Bangladesh for 2 years or less
- 3. Average Bangladesh import of product (HS6) > US\$ 1 million
- 4. Nepal's average RCA > 1 and average export (HS6)>US\$ 100000
- 5. Remove products that have declining import in Bangladesh
- 6. Add products prioritized by the government and stakeholders. The consultation with stakeholders have revealed these products as Yoghurt, buttermilk, fats and oils, processed cheese,vegetables-Tomatoes, cauliflowers,cabbage etc. fruits- avocadoes,organdies, kiwi fruit etc. Other vegetable products such as rudrakshya and amriso.

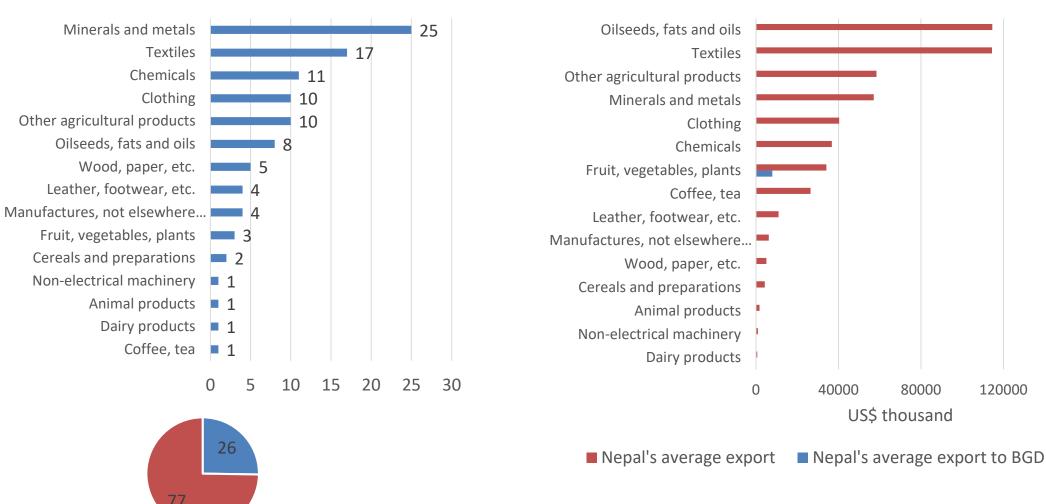

Potential Export Products

- 103 products (at HS6 level)/164 products (at HS8 level) if 'declining imports' not accounted for
- 58 products (at HS6 level) if 'declining imports' accounted for

Potential export products profile

Number of identified potential products

Nepal's average export of identified products

Reasons for untapped export potential: trade barriers

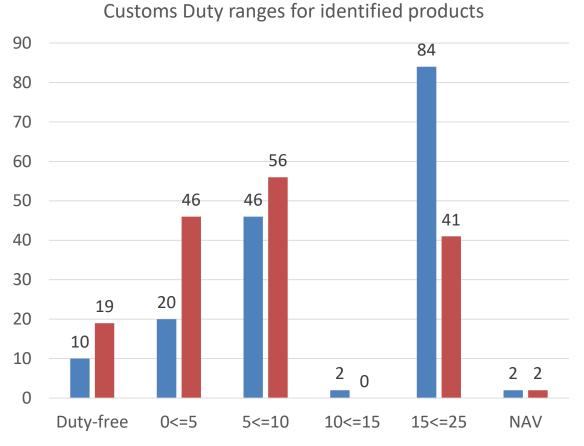

• Tariff barriers

- Tariffs on several products restrictive/prohibitive (25% customs duty)
- Negative preferences due to Bhutan's duty-free plus para-tariff free access on some products (including agricultural products of export interest to Nepal, e.g. large cardamoms, ginger, vegetables, fruits and juice, etc.)

Para-tariff barriers

- Other duties and charges: Regulatory Duty (RD), Supplementary Duty (SD), Value Added Tax (VAT), Advance Income Tax (AIT), and Advance Trade VAT (AVAT) are collected at the Customs point
- Some charges such as regulatory duty (of mostly 3%) apply exclusively for imports and even apparently trade-neutral SD and VAT are paratariffs in disguise as exemptions are granted for some domestic products (World Bank 2018)
- With the inclusion of para-tariffs, the simple average tariff (FY2016/17) almost doubles, from 13.3% to 25.6% (World Bank 2018)
- Often identified as the sole reason for zero or low export by exporters

Potential export products: tariff profile

Number of tariff lines (MFN)

Number of tariff lines (applied/SAFTA)

Import duties summary (%)							
	Min	Median	Mean	Max			
Customs Duty (MFN)	0	25	16.58	25			
Customs Duty (applied)	0	5	9.636	25			
Total Tau lu sidanas							
Total Tax Incidence (applied/SAFTA)	0	34.6	46.65	131.2			

Potential export products: tariff profile

• 82 products (out of 164 products at TL) receive SAFTA concessions

Duties for identified products that qualify for SAFTA preference							
	Min	Median	Mean	Max			
CD (MFN)	5.00	25.00	17.62	25.00			
CD(applied/SAFTA)	0.00	3.00	3.56	5.00			
TTI(applied/SAFTA)	5.00	31.00	38.26	112.36			

• 10 additional products have zero customs duty (zero MFN); but the average total tax incidence is 14.03%.

Other duties and charges (para-tariffs) in Bangladesh

	Tariff lines affected	Rates (percent of affected tariff lines in parentheses)	
	Number	Share, %	
Regulatory Duty	3030	45	3(99%), 15, 20
Supplementary Duty	1523	22.6	20(61%), 45 (21%), 30(5%), 10(4%), 60(4%), and six other rates between 100% and 500% (5%)
Value added tax	730	10.8	15
Advance Income Tax	ALL	100	5
Advance trade VAT	ALL	100	5

Nepal-Bangladesh Preferential Trade Agreement to counter tariff/para-tariff barriers

- PTA in discussion for some time now
- PTA could enhance Nepal –Bangladesh trade (including currently dismal Nepal's exports to Bangladesh) against the backdrop of high tariffs and para-tariff barriers
- Some challenges
 - Removal of not only tariff (custom duty) but also para-tariffs
 - Unconditional MFN treatment to India (Nepal-India trade treaty)

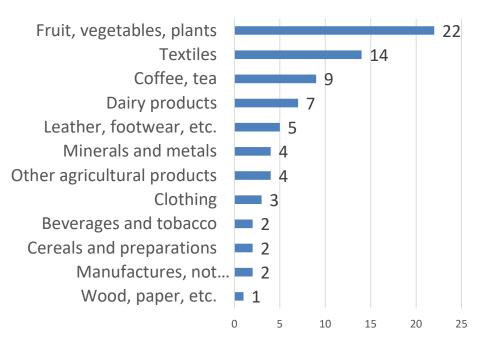

Nepal's request list: 130 (HS8), 75(HS6)

Products in Nepal's request list (HS6)

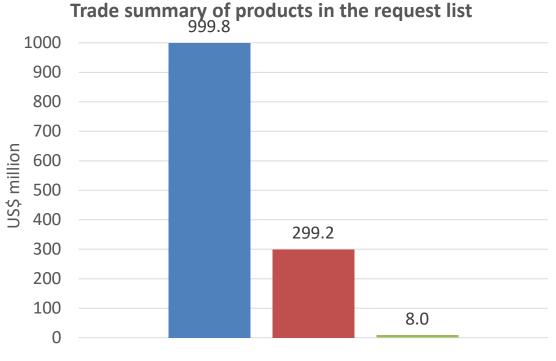

Agricultural products Non-agricultural products

Min Median Mean Max							
Customs Duty (MFN)	0	35.6	38.69	61.59			
Customs Duty SAFTA)	0	24.67	28.49	53.99			

Need to consider the impact on domestic industry, jobs, revenue loss (including revenue loss emanating from automatic preference granted to India)

Non-tariff barriers

- A large number of NTMs attracted by agricultural products (many are not yet NTBs!)
- Some NTMs (e.g. certification) are cumbersome
- Lack of advance payment provisions
- Other issues: high reference price, logistics issues (sub-optimal customs infrastructure), business visa issues, harassment/informal payments along the trade route, etc.

Addressing issues to enhance Nepal-Bangladesh trade

- Addressing tariff/para-tariff barriers: Preferential Trade Agreement (PTA) that reduces/eliminates tariffs, inclusive of para-tariffs; better dissemination of information regarding SAFTA concessions and certificate of origin (SAFTA)
- Addressing NTBs and procedural obstacles: Proactive engagement with Bangladeshi counterparts (and also India) for better trade facilitation, elimination of NTBS, etc. (operationalization of BBIN MVA?)
- Payment issues
- Other issues apart from NTBs
 - customs infrastructure
 - -issuance of visa
 - NTWC charge (0.4% of export value)
 - -harassment at the border

Summarizing the discourse

- Nepal's regional trade is dismal if we take India out of the equation
- Bangladesh market may be an apt destination because of several features but market access may be an issue: non-tariff barriers, while they exist are not trade impeding, but tariff/para-tariff barriers are
- Successful completion of PTA while safeguarding Nepal's interests such as protection of key industries, jobs, etc. may be a way forward
