Digital payment integration to facilitate cross border payment in South Asia

Despite a large volume of movement of payments between Nepal and India, a lack of digital payments integration between the two countries has been creating issues for tourists. The MoU signed by the two countries’ national payment system providers in June this year has paved the way for cross-border digital payment integration.

Globally, and in Nepal, the COVID-19 pandemic accelerated the use of digital and contactless payments as the fear of direct contact through transfers has accelerated the use of cashless transactions. New payment instruments have evolved in the payment system: Quick Response (QR) codes, Instant payment systems (IPS), cardless withdrawal, Smart Point-of-Sale (POS), NFC technologies and virtual cards. Digital payments have improved consumer access and can also reduce the circulation of cash, whose printing costs are quite regrettive in the national currency. Nepal Rastra Bank (NBR), the central bank, has been encouraging the use of digital payment systems.
